OEKO-TEX®
 OEKO-TEX® STANDARD 100 is one of the world's best-known labels for textiles tested for harmful substances. Every Iqoniq article is OEKO-TEX® certified, so you can be certain that every component (every thread and accessory) has been tested for harmful substances and that the article therefore is harmless for human health.

Aware™
 Aware™ makes data public to track and validate the end-to-end impact of sustainable textiles from origin to consumer. The Aware™ process begins with embedding a physical tracer in the sustainable textile at source. Scanning, using the Aware™ hand scanner, enables instant verification along the entire value chain. Production data logged on public blockchain by every supplier creates a digital twin and virtual flow that follows the physical material flow forward. Every step is validated by Aware™'s digital tokens – the world's first crypto TCs. This innovative platform transforms a system hidden behind private databases into a democratic, open and user friendly platform. With a quick scan of a QR code on the label of a product, shoppers can access the Aware™ Virtual ID, which is a digital product passport (DPP) showing all data and making choosing better easier.

Our colour equivalences only serve as a guideline. The actual colours may vary slightly.
